XYVGR™

Key benefits:

- ✓ Modulates libido-busting stress hormones
- ✓ Delivers potent antioxidant support
- ✓ Supports penile smooth muscle relaxation and engorgement
- ✓ Improves erectile and endothelial function
- ✓ Helps ensure peak stamina and a firm, long-lasting erection

XYVGGR™ is a carefully selected combination of five critical ingredients to enhance sexual vitality by modulating libido-draining stress chemicals, delivering potent antioxidant support, maximizing endurance and stamina, and promoting penile smooth muscle relaxation for a firm, long-lasting erection. *

L-CITRULLINE

This amino acid converts into L-arginine—an essential ingredient in the production of nitric oxide (NO), which is responsible for relaxing penile smooth muscle tissue and facilitating engorgement. While L-arginine itself has been shown to metabolize rapidly—rendering it ineffective in the effort to stimulate NO secretion—clinical research suggests that its precursor L-citrulline may play a critical role in achieving a firm, long-lasting erection. As an oral supplement, L-citrulline is readily converted into L-arginine by the kidneys, while bypassing intestinal and liver metabolism and inhibiting arginase, which can negatively impact L-arginine’s ability to promote nitric oxide activity in the penis.

EPIMEDIUM GRANDIFLORUM

Also known by its common name horny goat weed, *Epimedium grandiflorum* is a well-known aphrodisiac botanical that is rich in the flavanol icariin. As this herb’s primary active component, research has linked icariin-standardized horny goat weed extracts with a number of sexual health benefits. Studies show that icariin naturally and effectively stimulates erection-firming nitric oxide activity, while enhancing endurance by supporting normal levels of cGMP-specific phosphodiesterase type 5 (PDE5)—the enzyme typically responsible for winding down male sexual response.

RHODIOLA ROSEA

Rhodiola rosea is a popular research-supported adaptogen. A multitude of published clinical studies support *Rhodiola*’s well-known and established benefits to energy levels, stress management, immune function, and cellular health, as well as its role as a potent antioxidant. Given the strong connection between stress and increased sexual dissatisfaction, supplementation with this vital botanical becomes all the more important.

POLYGONUM CUSPIDATUM

This botanical, also known as Japanese knotweed, is a rich source of resveratrol—a natural antioxidant powerhouse with a growing roster of research-supported benefits for a variety of age-related challenges, including circulatory and sexual health concerns. Studies indicate that resveratrol supplementation may help to ward off atherosclerotic changes associated with imbalanced cholesterol, while enhancing vital nitric oxide circulation, erection quality, blood testosterone levels, and sperm count and motility. The result is safe, powerful support for superior erectile function and endothelial health.

POMEGRANATE

Analysis shows that this prostate-nourishing antioxidant is rich in anthocyanin—a powerful flavonoid that enhances erection-stimulating nitric oxide bioavailability, while promoting arterial health and optimal penile blood flow. As a result, controlled trials have revealed that supplementation with pomegranate may be able to facilitate firm erections and enhanced sexual performance in men with both cardiovascular and erectile function concerns—two challenges that often present simultaneously.

Your patient is more than just the sum of his parts.

Combined with targeted lifestyle changes, XYVGGGR™ can help maximize post-diagnosis health while creating an internal microenvironment that is hostile to prostate cancer.

About XY Wellness

XY Wellness manufactures science-based nutritional formulas according to the highest standards of purity and safety. But we don't stop there.

Prostate treatment does not have to rob your patients of their quality of life. With the XYW nutritional products, men have an opportunity to be fitter, more productive and more sexually vital after conventional prostate cancer therapy.

To help you make XYVGGGR™ easily available to your patients, we created a Practitioner Program. Contact XY Wellness [Practitioners Program](#) or call 608 220-3535.
