

FULL SPECTRUM™ OMEGA

Sustainably-caught, wild Alaskan salmon

The full range of 17 naturally-occurring fatty acids

With vitamin D and astaxanthin

Adding omega 3 fatty acids to your diet is one of the most important steps you can take to improve and maintain health. Omega 3 helps enhance brain function, learning, and mood, improves cholesterol values and heart health, reduces inflammation in joints and throughout the body, and supports the health of the eyes and skin. Every cell in the body needs the right fats to function properly. Consuming healthy fatty acids like those found in fish oil gives every cell a better chance to function more efficiently – importing nutrients and energy, dividing properly, and expelling unwanted materials.

Sisu Full Spectrum™ Omega Wild Alaskan Salmon Oil is carefully manufactured from sustainably-caught salmon and provides the full, natural range of whole fatty acids in ratios that reflect those found in wild salmon for increased bioavailability and environmental responsibility.

Product Highlights

- Provides the full range of 17 naturally-occurring fatty acids, including the essential omega 3 and 6 as well as omega 5, 7, and 9
- Manufactured using a proprietary process that eliminates potential impurities without changing the ratio of naturally-occurring whole omega fatty acids, including EPA and DHA, the active compounds in omega 3
- Omega 3 EPA and DHA support brain, heart, and eye health, reduce inflammation, and improve the health of the skin
- Source of natural vitamin D3 and astaxanthin, a powerful antioxidant derived from specially-grown, freshwater algae free from environmental contaminants and with no impact on any marine environment
- Naturally preserved with antioxidant GMO-free tocopherols, rosemary leaf extract and thyme and clary sage oils
- IFFO-certified* for environmentally-responsible sourcing and production

EACH SOFT GELATIN CAPSULE CONTAINS:

Medicinal ingredients:

Fish oil (Salmon) (*Salmonidae* – whole) 1,200 mg
(101 mg EPA [eicosapentaenoic acid],
