

The Science of a Healthier Life®

Biotin

Item #00102 • 600 mcg • 100 capsules

Supports healthy hair & nails

Biotin is a water-soluble vitamin that belongs to the vitamin B family. It's necessary for the production of keratin, a protein that is a structural component of hair, nails and skin.

- Supports healthy hair, skin and nails
- Necessary for cellular energy production
- Promotes healthy gene expression

As we get older, our bodies produce less of the structural proteins that we need to maintain healthy hair, skin and nails. Biotin helps produce keratin, one of those important proteins.

Biotin is also used as a cofactor in the body, supporting the activities of enzymes involved in cell energy, fatty acid synthesis and amino acid breakdown.

Help your customers maintain healthy hair, skin and nails with this B-vitamin supplement.

Biotin can help maintain healthy levels of keratin, a structural protein that builds healthy skin, hair and nails.
